

# United Rentals

United Rentals is the largest equipment rental company in the world, with nearly 700 rental locations throughout the United States, Canada, and Mexico. Our 12,000 employees serve construction and industrial customers, utilities, municipalities, homeowners and others.

## **Equipment Rentals**

As the largest equipment rental company in the world, United Rentals stocks reliable equipment in more than 20,000 classes. We offer the most popular names in the industry to ensure our customers are getting trustworthy, reliable brands. We have the resources and expertise to service our customers from selection to delivery.

## **New and Used Equipment Sales**

United Rentals is a distributor for many leading manufacturers, and we sell quality used equipment that has been maintained to factory standards.

## **Contractor Supplies**

United Rentals sells a comprehensive range of contractor supplies, including saw blades, safety gear, and power tools. Hundreds of line items can be purchased at our branches and through our 24-hour call center making us the premier full-service provider for all jobsite needs.

## **Repair and Maintenance Services**

Our professionally trained and licensed technicians are experienced in virtually all types of construction equipment, large and small. Our customers receive the same diagnostics, manufacturer-recommended parts and expertise we use with our own rental fleet.

## **Training and Certification**

As the leading industry provider of training solutions, we know the local, state, provincial and federal regulatory issues that affect jobsites across North America. Customized training programs are also available for national accounts and government programs.

## **Technology**

Our company's sophisticated information system, RentalMan<sup>®</sup>, links the entire United Rentals branch network and provides instant information about equipment availability at nearly 700 branches.

For our customers, we provide URdata online access to account management, including equipment status, statements and trends.

United Rentals has experts in five specialty divisions, who are dedicated to giving our customers the widest range of choices, backed up by our commitment to exceptional service.

#### **General Rental**

Reliable equipment in 600 different categories serving commercial, industrial, municipal, and residential construction needs.

#### **Aerial Equipment**

Diversified fleet to meet aerial requirements – maneuverability, transportability, heavy lifting, rough terrain or reach capabilities.

#### **Trench Safety**

Specialized equipment to help protect the safety and productivity of our customers' underground construction crews.

#### **Pump Power HVAC**

Equipment to help plan for temporary power needs, disaster recovery, reclamation projects and HVAC for large events.

#### **Heavy Machinery**

Equipment for earthmoving challenges including adverse surface conditions, severe grades and hidden resistance.
