

More of Everything

Oakwood

The Oakwood combines efficiency and luxury in a single plan. The U-shaped kitchen is the optimal design for saving steps and time. The pantry in the kitchen and the storage possibilities of the large adjacent utility room maximize the efficient use of space. Easy access to the outside through the utility room (which can also serve as a mudroom on rainy days) means convenient offloading of groceries and supplies where they are used and stored. The master suite features two walk-in closets and vanities to prevent delays on busy mornings, a luxurious garden tub, and stand-alone shower. The dramatic cathedral ceiling and inviting corner fireplace contribute to this attractive design.

1,949 sq. ft.
