Magnolia

The Magnolia is the plan for that narrow lot. It has ample storage space (note the two walk-in closets in the master bedroom and the two closets in each of the other bedrooms). The large, open kitchen and breakfast area promote casual dining. The utility room is conveniently located between the two children's bedrooms and by their bathroom. The large family room has a central fireplace, cathedral ceiling and atrium doors, and looks out onto the large back porch which is perfect for entertaining and relaxing evenings.

1,761 sq. ft.
